Abdulaziz Bin Nawaf Bin Abdulaziz Al Saud

Introduction

In the name of Allah the most compassionate the most merciful

The most important issues in societies, is the solidarity of the individual and institutions. This is embodied more in our Islamic society than any other nation, the love of philanthropist and the intention of progress are the features that have crystallized by distinctive individuals. The globally known King Faisal's Award (May god have mercy on him) in terms of its goals and international echoes, aiming to encourage more scientific achievement and distinction of the current and future generations.

The specialization of Radiology in medical practice is a rare and unique specialty which shows vision for the future. We require full knowledge to recognize its advantages by doctors, technicians, researchers and directors.

We thank god for blessing us with individuals such as his Royal Highness Prince Abdulaziz Bin Nawaf. He has shared his visions, ideas and methodology towards this award. This award is for researchers who can now be given the chance to be rewarded for their efforts. We thank his royal highness and those who stand behind this award and wish them success.

About the award

Prince Abdulaziz Bin Nawaf's award for scientific innovative superiority in the field of medical Radiology, represents the prince's encouragement towards the Riyadh Radiology Club of which he is the honorary president. His royal highness's idea was widely welcomed by all club affiliates and board of directors.

Targeted Sector

Radiology directors, Radiologists, Researchers, Apprentices, and Radiology Technicians, Interventional and Radiotherapy Staff.

Award Goals

- Encouraging physicians to get involved in scientific research.
- Developing the abilities of doctors under training to research in the scientific field.
- Encouraging technicians and those who relate to this science to develop themselves by continuous research.
- Public awareness of the advantages and disadvantages of Radiology.

Award value

S.R 30,000 will be rewarded to each of the three winners.

Award Resources

The financial resources of the award depend on the sum of money that will be annually allocated by his Royal Highness Prince Abdulaziz Bin Nawaf.

The Award future

Those who are responsible for this award are working on its expansion in order to include a larger number of the rare subspecialties in the future.

Meanwhile, expanding its area not only to Saudi Arabia and Gulf countries but also all other Arab countries in the second stage, Asian countries in the third stage and finally countries of Europe and America.

At the same time, expanding the award resources within the increasing geographical areas.

The award domain

The award is eligible to:

1. The best Radiological scientific research presented by a Consultant Radiologist.
2. The best Radiological scientific research presented by a Radiologist under training.
3. The best scientific research presented by a Radiology technician, directors and nurses in the relevant field.

Award's Rules and Regulations

- The Award is granted to the best researches conducted in the kingdom of Saudi Arabia and Gulf countries.
- The award can be granted to three winners in this field according to their specialization, and subscription of two winners is allowed for one award, if the arbitration committee considers this.
- In case of equality of two candidates, the award can be granted by lottery, if the committee considers the award to be granted to one person.
- In event of no applicant for this award at one field or some of them not fulfilling the conditions, the committee can cancel the award in a specific domain for a year, thus increasing the value of the award or the number of winners in other fields.
- The arbitrary committee selects the winners.
- The award is granted once to the winner, and allows him / her to apply after two years.

Conditions of candidacy

1. The candidate should be a member of The Riyadh Radiology Club by subscribing through the website even if outside Riyadh city.
2. The candidate should be a Radiologist, under training radiologist, researcher, technician, nurse or director in the field of radiology.
